

DAVID FARID NOSHY

Cybersecurity Analyst & Network Security Engineer

Egypt • 01223069795 • davidfarid38@gmail.com • [LinkedIn](#)

PROFILE SUMMARY

A dedicated and detail-oriented Computer Science student with a profound specialization in Network Security, Ethical Hacking, and System Administration. Possesses strong practical knowledge of infrastructure vulnerability assessments, penetration testing methodologies, and secure system configuration. Adept at leveraging programming expertise to automate security tasks and build robust environments. A proactive problem-solver highly capable of driving independent initiatives while collaborating efficiently within multi-disciplinary technical teams.

EDUCATION

Arab Academy for Science, Technology and Maritime Transport (AASTMT) 2023 – 2027 (Expected)

Bachelor of Science in Computer Science – College of Computing and Information Technology

- Current Status: Third-Year Student.
- Core coursework focused on advanced networking, algorithmic structures, and systems software.

CERTIFICATIONS & PROFESSIONAL TRAINING

Ethical Hacking (CEH) Training 2025

- Comprehensive training in vulnerability assessments, network penetration testing, attack vectors, and infrastructure defense.

Red Hat System Administration I 2025

- Acquired deep competencies in Linux command-line environments, user management, file security permissions, and system process monitoring.

Computer Network Fundamentals & Implementation 2025

- Hands-on mastery of architecture design, enterprise routing protocols, switching techniques, and standard network deployments.

Network Infrastructure & Security Suite 2024 – 2025

- **Network Infrastructure Certificate** – Issued by ITIDA.
- **Introduction to Network Security** – Cisco Networking Academy.
- **Introduction to Cybersecurity** – Cisco Networking Academy.
- **Cloud, Virtualization, and Network Virtualization Concepts** – Deep dive into software-defined networks (SDN) and virtualized security perimeters.

Specialized Technical Tracks August 2025

- **Cybercrime and Digital Evidence:** Structural analysis of digital forensics, electronic tracing, and legal compliance.
- **Getting Started with Deep Learning:** Administered by NVIDIA, targeting neural network training and foundational AI applications.

TECHNICAL SKILLS

Security & Systems:	Penetration Testing, Vulnerability Assessment, Linux Administration (Red Hat), Digital Forensics
Networking:	TCP/IP, Routing & Switching, Network Virtualization, Infrastructure Deployment
Languages:	Python, C#, Java, C++, C, JavaScript
Professional Core:	Analytical Problem Solving, Technical Documentation, Business English (Certified by OTO Courses, Nov 2024 – May 2025)
